

Getting Started.

If you are new to crypto currencies or have never purchased a crypto currency, there are a few simple steps you need to take to get you going.

You will need an initial wallet to hold Ethereum.

Ethereum is the crypto currency you will use to buy Pindex Tokens.

There are quite a lot of wallets available these days and many exchanges that will convert your local currency into crypto currency.

All exchange services will give you a wallet when you create an account with them.

There are also wallet services that have exchange tools built into them.

We recommend that you use the biggest wallet / exchange services to get started.

These include:

www.blockchain.com

www.coinbase.com

www.bitstamp.com

You can also do an internet search if you prefer to use a wallet / exchange based in a specific country.

When you have created your wallet, you will need to buy Ethereum.

Most of the larger wallet services offer you the option to load your wallet with Ethereum by buying it via them.

You can also shop around to see if you can get a better rate.

Many wallet and exchanger services will require you to upload a proof of identity.

This is a quick process to complete and will allow you to purchase increasing amounts of Ethereum.

So please make sure you have a valid colour copy of a photo ID.

A copy of passport, driver license or ID card are accepted.

You may also be asked to provide a proof of address.

When you have a verified wallet account, you will be able to buy, hold and transfer Ethereum to other Ethereum wallets.

When you have loaded your wallet with Ethereum, you can proceed to follow the instructions on the Pindex Token site to complete your token purchase.

IT IS IMPORTANT THAT YOU FOLLOW THE STEPS / INSTRUCTIONS ON HOW TO BUY PINDEX TOKENS.
